Voter Export Overview

These Voter data files contain the complete files of all Voter data including District Zone types within the district fields, Zone Codes within the district fields that link to district names and up to 40 elections found in the Voter Export record.

The attached tables for each file type indicate Field Description, Field Type and Comments.

Voter Export

This file contains the voter export records. Refer to the Zone Types and Zone Codes documentation for District 1 to District 40 fields. Refer to the Election Mapping documentation for Election 1 to Election 40 fields. Refer to Political Party Codes and Descriptions documentation for Party Codes fields.

The file is a tab delimited file where string fields are surrounded by quotes.

Name of the file: {county name} FVE {YYYYMMDD}.txt

Field Number	Field Description	Field Type	Comments
1	ID Number	String	SURE Voter ID number

Zone Types Export

This file contains the types of districts into which a county has its voters segmented. The voter record in the voter export file contains district fields that may designate the voter's school district, State House, State Senate, U.S. Congress, etc. This file determines what type the district field is denoted as.

The contents of this file may be different for each county.

The file is a tab delimited file where string fields are surrounded by quotes.

Name of the file: {county name} Zone Types {YYYYMMDD}.txt

Field Description	Field Type	Comments
County Name	String	County the file is exported for. Ex. ADAMS, CUMBERLAND, DAUPHIN, etc.
Zone Number	Int	District field found in the voter export. Ex. 1, 2, 3, etc.
Zone Short Name	String	Ex. Prec, WD, SC, STH, STS, USC, etc.
Zone Long Name	String	Description Ex. Precinct, Ward, School District, State House, State Senate, U.S. Congress, etc.

Zone Codes

This file contains the names of the districts in which voters may be registered. The voter record in the voter export file may contain these codes within the district fields that will link to these records.

The contents of this file will be different for each county.

The file is a tab delimited file where string fields are surrounded by quotes.

Name of the file: {county name} Zone Codes {YYYYMMDD}.txt

Field Description	Field Type	Comments
County Name	String	County the file is exported for. Ex. ADAMS, CUMBERLAND, DAUPHIN, etc.
Zone Number	Int	Appropriate district field found in the voter export. Ex. 1, 2, 3, etc.
Zone Code	String	Code found in the district field located in the voter export. Ex. MN11, JD402, 11-1, etc.
Zone Description	String	Description of the Zone Code. Ex. MAIN TOWNSHIP, 123 JUDICIAL DISTRICT, JONES TOWNSHIP, etc.

Election Mapping

This file contains the crosswalk for the elections found in the voter export record. Up to 40 elections will be exported in the voter export record. These elections are based on the "snapshot" that the SURE county executed within the SURE system. The Department is not responsible for which elections are included or not included in the "snapshot." No other elections will be exported in the voter record beyond 40 at this time.

The contents of this file will be different for each county.

The file is a tab delimited file where string fields are surrounded by quotes.

Name of the file: {county name} Election Map {YYYYMMDD}.txt

Field Description	Field Type	Comments
County Name	String	County the file is exported for. Ex. ADAMS, CUMBERLAND, DAUPHIN, etc.
Election Number	Int	Appropriate election field found in the voter export. Ex. 5, 1, 7, etc.
Election Description	String	Name of the election setup by the county. Ex. 2006 General Primary, 2000 General, etc.
Election Date	Date	MM/DD/YYYY

Political Party Codes and Description File

This file contains the Political Party Codes and Descriptions associated with each political party code found on the Full Voter Export. This can be used as reference for the Party Code line and the Election 1 through Election 40 Party lines.

When referencing the Party Code line, this is the political party that the voter is currently registered as. In relation to the Election 1 through Election 40 Party Lines, the Party Code that is displayed is the political party that the voter was registered as at the time of the election.

The contents of this file will be the same for each county.

The file is a tab delimited file.

Name of the file: PoliticalPartyCodesandDescriptions.txt

Instructions for Importing a Full Voter Export (FVE) File into Microsoft Access

The following instructions provide the steps necessary to import a Department of State (DOS) FVE file into Microsoft Access 2003. *Please note that if the disk you received from DOS contains zipped files, you will need to uncompress these files elsewhere and save them before attempting to import the data into Access.*

1. Open Microsoft Access. Click on the 'File' menu, and select, 'New.'
2. From the 'New File' menu that opens on the right-hand side of the screen, select 'Blank database...'
3. Select a File name and save the new database file in the location you choose by selecting 'Create'.
4. Return to the 'File' menu, and select, 'Get External Data,' choosing 'Import' in the subsequent menu.
5. In the 'Import' window that appears, select 'Text Files' from the 'Files of type' drop-down box at the bottom.
6. In the 'Look in' drop-down box at the top of the 'Import' window, navigate to the FVE file on the disk provided (or on your computer if you have saved the file there).
7. Double-click on the FVE file you wish to open. The 'Import Text Wizard' will initiate.
8. On the first 'Import Text Wizard' window, ensure that 'Delimited' is auto-selected at the top, and click the 'Next' button at the bottom.
9. On the next screen of the 'Import Text Wizard,' ensure that 'Tab' is auto-selected at the top and click the 'Next' button at the bottom.
10. On the next screen of the 'Import Text Wizard,' ensure that 'In a New Table' is selected at the top and click the 'Next' button at the bottom.
11. The next screen of the Wizard gives you the option to name specific fields of the database. Name the fields by selecting each column and typing the name of each in the 'Field Name' box if you wish. When finished, click the 'Next' button at the bottom.
12. The next screen of the Wizard gives you options for adding a primary key to the table you are creating. It is recommended that you select 'Choose my own primary key,' and highlight the first field. This field contains the Voter ID number. Click the 'Next' button at the bottom after selecting a primary key.
13. The next screen is the last screen of the 'Import Text Wizard.' After reviewing the options on this screen, click the 'Finish' button at the bottom. It may take some time for the program to import the data, depending on the size of the file.
14. You will receive a message when the import is complete. Click 'OK.'
15. Double-click on the FVE file name in the table tab. This will open up your new table with the FVE data in it. You may now save, sort, and manipulate the data as you wish in the Access file.
